

Beate Rusch

KOBV-Zentrale im Zuse-Institut Berlin (ZIB)

Mirror, mirror in my hand

Who is the fairest in the land?

On the restructuring of information infrastructure

I try *not* to talk about ...

politics (at least not much),

but instead about general concepts

on redundancy and uniqueness.

Redundancy is a matter of perspective.

Redundancy is a matter of reference.

No redundancy in the cloud anymore?

Germany's consortias next steps.

Resilience and innovation.

The king wants something new.

Thank
you
for
listening!
